

ARE YOU SICK OF WASTING TIME DIGGING THROUGH YOUR FILING SYSTEM LOOKING FOR A PREVIOUS SERVICE FILE?

HOW OFTEN DO YOUR ADVISORS HAVE TO
PULL A SERVICE FILE BECAUSE THEY CAN'T
FIND THE INFO THEY NEED IN THE DMS?

AFTER THE REPAIR IS COMPLETED, ARE YOU:

- STEP 1** Sort RO's into new or existing customers
- STEP 2** Create New/ Retrieve Existing File
- STEP 3** Pair repair order with other department forms, in proper order
- STEP 4** Refile inactive files to long-term storage
- STEP 5** REPEAT. (Hoping file is where it should be)

*If your dealership is like most, **you spend \$20 in labor on each document, meaning time spent on filing, sorting, storing and retrieving of documents.***

Now you can virtually eliminate the cost, bulk, inconvenience, and confusion of paper and focus on the things that keep your customers coming back!

WHAT IF YOU ONLY HAD TO:

STEP 1

Upload new documents

SIMPLE

SAFE

FULL ACCESS

STEP 2

Index new documents

FULL CONTROL

COMPATIBLE

STEP 3

Re-Search when needed

COST-EFFECTIVE

= PEACE OF MIND & SAVING \$\$\$

**ALL FROM THE DEVICE AND DMS
OF YOUR CHOICE!**

**IF YOU HAD A WAY TO PULL PREVIOUS RO'S THAT WAS
QUICK AND EASY AND THE FILES NEVER GOT LOST,
IS THAT SOMETHING YOU'D WANT?**
