

ACCESSIBLE INFORMATION ON A TIGHTER BUDGET

Today's educational institutions face greater challenges than ever before. Operating costs and government regulation continue to increase. Government funding for education is shrinking. Operating at optimal efficiency and accuracy is critical for continued success.

DIGITAL TECHNOLOGY, INC., (DTI) has a document management solution that enables educational institutions to streamline mission-critical business processes while reducing costs, improving service and ensuring compliance.

Paper-driven processes, long student record retention periods, and increased regulatory requirements characterize education operations. By digitizing, standardizing, and automating your processes, DTI ACCESSPoint enables your institution to run more efficiently and cost-effectively.

Educational institutions utilize DTI to optimize and streamline the full range of operations:

- Admissions
- Financial Aid
- Registrar
- Human Resources
- Accounts Payable
- Alumni Records
- Development

The DTI electronic document management (EDM) solution is a configurable, scalable solution that can be deployed to meet your institution's specific requirements...now and into the future. Our open architecture enables rapid integration with your existing student information systems and other lines of business applications (e.g., accounting, financial management, human resources,) to fully leverage their capabilities and your existing technology investment.

Digital Technology is committed to the education market and to offering software solutions that will enhance the use of core education software solutions.

By choosing Digital Technology, Inc., you will find an organization and software solutions that are committed to being a high-quality offering available to educational institutions. Most importantly, DTI is an organization that puts servicing the customer with integrity first. Our business philosophy is simple. Understand what the client needs. Match deliverables to the client's expectation; Give the customer consistent, honest and reliable service at a fair and reasonable price that always fits into our customer's business model.
